

The BTjet range of TIJ printers are built solid and durable, made of aluminum for easy maintenance. Fully independent without any PC, the BTjet is ready for immediate job creations on a tablet. Menu lock prevents unauthorized change of printing parameters, and it has an internal memory for the last print task - “switch on and print” function. A single tablet allows the control of many BTjet controllers, reducing the cost of multiple installations.

A wide range of accessories are available, from optical sensor to encoder, mounting bracket and print head holder.

Features:

- Fully independent without PC – immediate job creation on a tablet
- Internal memory for last print task – “switch on and print” function
- Menu lock to prevent unauthorized change of printing parameters
- “Unlimited” memory for print tasks, settings & variables on SD card
- Compact versions and standardized cables for connection
- Easy and quick installation on any production line
- Small size, ready mounting points
- Expandable to multiple print heads and various options
- Available in black, blue, red, orange gold, and customized colors

Models	Print Head		Memory / Max Speed	External Interface	Display Control	Printing Mode	Printing Data	Print Heads / Alerts
